

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
1  <p>The Union Budget for 2026-27 decides how India will spend and save money for the whole year.</p>	2  <p>It's World Wetlands Day! Wetlands are called the Kidneys of the Earth because they filter water, store carbon and protect us from floods.</p>	3  <p>On February 3, 1966, the Soviet spacecraft Luna 9 became the first mission to make a soft landing on the moon and send back photos from its surface.</p>	4  <p>Time-lapse studies show that mango trees' branches droop after sunset, following a natural circadian rhythm.</p>	5  <p>Football superstars Cristiano Ronaldo and Neymar Jr share their birthday today.</p>	6  <p>Science has shown that your stomach has receptors that detect the sound of the ingested food and begin preparing for digestion.</p>	7  <p>The Shanay-Timpishka River in Peru reaches up to 100°C due to deep underground geothermal activity. It is so hot that it can cook an egg!</p>
8  <p>Emperor penguins can hold their breath for over 20 minutes and dive deeper than 500mts to hunt for fish!</p>	9  <p>The Pando Forest in Utah, USA, is actually one organism—every tree is a genetically identical stem from the same root system, estimated to be about 12,000 years old!</p>	10  <p>Today is World Pulses Day—a reminder that humble dals, chickpeas and beans give us protein, fibre and minerals.</p>	11  <p>We celebrate International Day of Women and Girls in Science today. This day recognises female scientists and encourages girls to be part of the world of science.</p>	12  <p>Today is Maharishi Dayanand Saraswati Jayanti, a day to remember the founder of the Arya Samaj who also pushed for education for all.</p>	13  <p>It's World Radio Day! Radio signals from Earth travel so far into space that our earliest broadcasts have passed more than 100 nearby stars.</p>	14  <p>It's Valentine's Day! What are you doing for your loved ones today?</p>
15  <p>Tonight is Maha Shivratri, a day when Lord Shiva's devotees fast and offer bel-patra and milk to the Mahadeva.</p>	16  <p>Mushrooms create their own micro-weather. They release water vapour that cools the air around them, creating tiny winds to spread spores farther.</p>	17  <p>The black sapote fruit has creamy, cocoa-like flesh. It tastes like chocolate pudding when ripe.</p>	18  <p>Ramadan, the holy month of the Islamic lunar calendar, is expected to begin today—depending on the sighting of the new crescent moon.</p>	19  <p>Maharashtra celebrates Shivaji Jayanti today to mark the birth anniversary of Chhatrapati Shivaji Maharaj.</p>	20  <p>Arunachal Pradesh and Mizoram celebrate their State Foundation Day today.</p>	21  <p>It's International Mother Language Day. Did you know that all modern Indo-Aryan languages trace their origins to Sanskrit?</p>
22  <p>The world's quietest room is an anechoic chamber at Orfield Laboratories in Minnesota, USA. It is so silent that you can hear your heartbeat, lungs and even your blood moving.</p>	23  <p>The Myrmarchne spiders, a genus of jumping spiders, mimic ants so well that they copy their antenna movements with their front legs.</p>	24  <p>Moonquakes happen as the moon's surface expands when the sun hits it after long lunar nights.</p>	25  <p>Late February is still prime time for migratory birds at places like Keoladeo National Park in Bharatpur, where they rest before flying back towards Central Asia and Europe.</p>	26  <p>In Arunachal Pradesh, the Nyishi community celebrates Nyokum around this date, where they pray for good harvests and harmony with nature.</p>	27  <p>India now celebrates National Protein Day on this day to raise awareness that most of us need to eat more protein for strong muscles and immunity.</p>	28  <p>India celebrates National Science Day today, marking the day in 1928 when CV Raman first observed the Raman Effect, work that won him the physics Nobel Prize.</p>

FEBRUARY 2026

ROBINAGE
